

MESSAGE OF THE ICREPQ SC CHAIRMAN

Dear Authors and Participants,

It is our great pleasure to invite you to **ICREPQ'12- "X International Conference on Renewable Energies and Power Quality"**, to be held in Santiago de Compostela, Spain, from 28th-30th March 2012.

This Conference, now in its 10th edition, is the major International Conference devoted entirely to renewable energies and power quality. Started in Vigo in 2003, is now established as a regular annual event.

Very successful ICREPQ conferences that were held in Vigo (2003), Barcelona (2004), Zaragoza (2005), Palma de Mallorca (2006), Sevilla (2007), Santander (2008), Valencia (2009), Granada (2010) and Las Palmas de Gran Canaria (2011). But now we'll held the ICREPQ ten edition and for us is very important one because it means that ICREPQ get up its majority of age and we want to organize a very unforgettable conference and, of course, this will be not possible without your participation.

This Conference, like its predecessors, is a forum for specialists engaged in the fields of renewable energies and power quality, to discuss current progress and future developments and trends in these two important areas, and also in those topics like: electric vehicles, electrical machines and drives, power electronics, control strategies, monitoring and diagnostics, etc, that are connecting with they. For to exchange information and experience of developments, trends and applications, from researchers, academics and professionals. Topics related to practical applications, operations, maintenance and teaching are also highly encouraged.

You are strongly encouraged to participate and submit papers to the ICREPQ'12 Conference. We also plan to hold an exhibition of some products related. Potential authors and other interested participants are most welcome to visit and discover the information of our conference web page. English will be the working language for all printed material, presentations and discussions.

Santiago de Compostela was the Cultural Capital of Europe and is UNESCO World Heritage City, Endpoint of the Pilgrimage Road, final destination of the legendary medieval way of pilgrims "Camino de Santiago" (Way of Saint James) and Capital of the Autonomous Community of Galicia and now we'll have also the opportunity to visit the City of Culture of Galicia rises on the top of mount Gaiás, near of the Santiago center, as a formidable architectural milestone for the new century. Designed by the American architect Peter Eisenman to host the best of cultural expressions of Galicia, Spain, Europe, Latin America and the World.

I would appreciate if you could send this information to Colleagues of yours that might be interested.

Thanks for your interest and hope to see you in Santiago de Compostela, in March 2012.

With my best wishes,

Manuel Pérez Donsión

Full Professor of Vigo University
