

INTERNATIONAL CONFERENCE

ON RENEWABLE ENERGY AND

POWER QUALITY

(ICREPQ'06)

WELCOME TO ICREPQ'06

On behalf of the Steering Committee I want to give you a very warm welcome to ICREPQ'06 and to Mallorca.

Our International Programme Committee has selected a high quality 84 papers (among 136 proposals) from which 76 will be presented at the Conference, 24 at oral sessions and 52 at poster sessions, along the three days of the ICREPQ'06. All of these are the papers included at the final programme. Also it will be presented two invited papers along two plenary sessions: "***Generator protections: new functionalities from advanced multifunction protection relays***" by Manuel Járrega Domínguez, Schneider Electric. "***The Politransformer Concept: A Multi-voltage Substation Power Transformer***" by Miguel Oliva Navarrete, ABB Power Technology, S.A. and an Opening Ceremony Speech: "***Baleares Islands's Energy Policy***" by Jaume Sureda. Director General de Energía. Balearic Island Government.

ICREPQ'06 cover the whole range of problems and solutions concerning specially with renewable energies and power quality and all the papers have directly influence about these two fields of research and practical work.

We would like to thank all the authors, session chairmen, participants without papers and at the International Program Committee members who have made important contributions by reviewing the proposals.

In addition to the technical sessions, a number of social events have been arranged. On Wednesday evening (5th April, 20:30 H) we will be held a Reception with aperitif at the Bellver Castle and on Thursday (6th April, 20:30 H) the Conference Banquet at the "Bahía Mediterráneo" Restaurant where we will deliver presents to those companies/institutions that collaborate with the organisation of the Conference and on Friday (from 15:00 H to 20:00 H) we have arranged an excursion for all the participants to Valldemossa.

I hope you will find the conference intellectually stimulating, that you will make many fruitful personal contacts here and that you will thoroughly enjoy your visit to Palma de Mallorca and the surrounding area.

Best regards.
Sincerely,

Prof. Manuel Pérez-Donsión
Chairman of the Steering Committee

OBJETIVES AND TOPICS.

The intention of the organisers is to give an opportunity to academics, scientists, engineers, manufacturers and users from all over the world to come together in a pleasant location to discuss recent development in the areas of Renewable Energy and Power Quality.

The International Conference on Renewable Energy and Power Quality (ICREPQ'06) will be structured in:

- **Plenary Sessions:** in one auditorium for all the participants
- **Oral Sessions:** Renewable Energy and Power Quality simultaneously in two rooms
- **Posters Sessions:** In 45-minute periods during the coffee breaks.

1. RENEWABLE ENERGY:

Topics include, but are not limited to:

- Wind Energy, Small Hydro Energy, Solar Energy, Photo-voltaic Energy, Ocean Energy, Geothermal, Biomass,...
- Classical and special electrical generators: Theory, design, analysis, losses, efficiency, heating and cooling, vibration and noise, modelling and simulation, control strategies, protection systems, maintenance, mechanical behaviour, new methods of testing, parallel Operation, stability,...
- Power plants. Distributed generation. Fuel cells. Co-generation. Hybrid Systems. Original solutions,...
- Energy conversion, conservation and energy efficiency. Energy saving policy. Energy storage. Batteries,...
- Energy and the environment. Ecological balance. Ecosystem,...
- Application of the renewable energy. Best practice projects.
- Legislation in the area of renewable energy.
- Biomass combustion techniques. The energy use of agricultural and forest residues. Production and the energy exploitation of bio-gas.
- Interconnection and transport problems.
- Planning and control of the power system take into account the renewable energy.
- Economic analysis of the power system take into account the renewable energy.
- Regulation/deregulation of the power market. Influence of the renewable energy.
- Models and simulation of the power systems. Models and estimation of loads. Software tools.
- Application of the telecommunications, internet, artificial intelligence for the Renewable energy.
- Security assessment and risk analysis in renewable energy.
- Electric vehicles.

2. POWER QUALITY:

Topics include, but are not limited to:

- Power Quality in Distribution.
- Economic Studies of the Power Quality
- Quality of the voltage wave
- Low-frequency conducted disturbances: Voltage deviations, voltage fluctuations (flicker), voltage dips and short interruptions, harmonics transient over-voltages, voltage unbalance (imbalance), temporary power-frequency variations.
- Sources, effects and mitigation methods of electromagnetic disturbances.
- Measurements of the power quality in networks and industrial installations.
- Equipment, procedures and measurement methods. Standards.
- Quality of the voltage wave measurements in the laboratory. Equipment, procedures and measurement methods and text. Laboratories. Standards
- Modelling and simulation of the power quality. Software tools.

- Transmission of the disturbances
- Filtering techniques
- Power factor compensation. Capacitor switching techniques
- Optimisation techniques
- Telecommunication, internet and artificial intelligence applications.
- Permanent monitoring techniques and online diagnosis
- Intelligent energy delivery systems. Uninterrupted power supplies
- Expert systems applications
- Devices, equipment and power systems. Control centres
- Specific problems and studies cases
- Power quality standards
- Power quality influence in deregulated markets

SPONSORSHIP

Sincere thanks are expressed to the organisations listed below who have given valuable support to ICREPQ'06:

- Balearic Islands Government
- University of the Balearic Islands
- GesaEndesa
- Schneider Electric Española, S.A.
- ABB
- Circutor
- Ministerio de Educación y Ciencia (MEC)

- AEDIE
- Vestas Eólica SAU
- IEEE
- Indielec
- Cedrat

TECHNICAL CO-SPONSORSHIP

The ICREPQ'06 has also counted with the invaluable Technical Co-Sponsorship of IEEE .

SOCIAL EVENTS

- **Reception and Aperitif:** 5th of April at 20:00 H at Bellver Castle.
- **Conference Banquet:** 6th of April at 20:30 H at "Bahía Mediterráneo" Restaurant.

AUTHORS

Oral Presentations.

Each speaker of an oral presentation has an available time of 15 minutes (12 minutes for the presentation and 3 minutes for questions) and must be in the session room 10 minutes before of the beginning of the session for to test the audiovisual equipment and for to exchange opinions with the Session Chairman.

Poster Presentations.

The poster must be put on the pin board that you previously can chose about 15 minutes before of the beginning of the session and it must be take off 15 minutes after of the end of the session. The author(s) must be stay near the poster along the 45 minutes of the session duration for to answer all the questions that the audience or the chairman could formulate. The maximum available surface for each poster will be 0,90 m x 0,90 m (width x high).

CHAIRMEN SESSIONS

On behalf of the International Program Committee, Steering Committee and the Organising Committee of the ICREPQ'06 and take into account their eminent position in the world of science we have selected 19 session chairmen. It is an honour for us their collaboration for to chair the sessions of ICREPQ'06 and their contribution would be greatly appreciated. We wish to express our warmer thanks.

Traditionally the Chairman of each Session is independent in organising the Session. Nevertheless it is of special importance that the different sessions chairmen preparing questions about the papers of his session in order to get a more dynamic one. Furthermore we expect of the session chairmen the following:

- Plenary sessions.

That each plenary session should not exceed 45 minutes including presentation and discussion, (35 minutes for presentation and 10 minutes for questions).

-Oral sessions.

That each oral paper presentation should not exceed 15 minutes including presentation and discussion, (12 minutes for presentation and 3 minutes for questions).

-Poster sessions.

The author(s) of a poster presentation must be stay near the poster along the 45 minutes of the session duration and in order to get a more dynamic session it is important that along this period of time each of the chairmen of the poster session formulate questions to the authors and check that all is OK.

Thursday 6 April 2006

ROOM A “GesaEndesa”
15:15 – 16:00 Plenary Session PL2 (Spanish)

Chairman: Debora Coll Mayor

PL2: Gesa y la I+D+i (Spanish)
Joan Frau, GesaEndesa

ROOM A “GesaEndesa”
16:00 – 16:45 Plenary Session PL3 (Spanish)

Chairman: Luis Ignacio Eguiluz Moran

PL3: Nuevos requerimientos de conexión a red para los parques eólicos
Jorge Martínez García, Vestas Eólica SAU

20:00 – 22:30 Conference Banquet at “Bahía Mediterráneo”
Restaurant (Optional)

Friday 7 April 2006

**ROOM A “GesaEndesa”
9:45 – 10:30 Plenary Session PL4**

Chairman: Shahrokh Saadate

PL4: The Politransformer Concept: A Multi-voltage Subestation Power Transformer.

Miguel Oliva Navarrete, ABB Power Technology, S.A.

**ROOM A “GesaEndesa”
11:00 – 12:00 Oral Session A3**

Chairman: Toni Dropulic

405 **A performance comparision between brush and brushless doubly fed asynchronous generators for wind power systems.**
