

RE&PQJ-7

Renewable Energy and Power Quality
Journal, No.7, April 2009

RE&PQJ EDITORIAL COMMITTEE

Manuel Pérez Donsión (Main Editor)
Ramón Bargalló Perpiña
Manuel Burgos Payán
Debora Coll Mayor
Mario Mañana Canteli
Mariano Sanz Badía

RE&PQJ SCIENTIFIC COMMITTEE

Alexandru, Catalin (Romania)	Kádár Péter (Hungary)
Andrada Gascón, P. (Spain)	Kladas, A. (Greece)
Andras, Dan (Hungary)	Klima, Jiri (Czech Republic)
Arcega Solsona, F. (Spain)	Lemos Antunes, C. (Portugal)
Arnaltes Gómez, S. (Spain)	Levi, Emil (U.K.)
Balestrino, Aldo (Italy)	Llombart Estopiñan, A. (Spain)
Barajas Forero, C.L. (Colombia)	Machado e Moura, A. (Portugal)
Bargallo Perpiña, R. (Spain)	Mañana-Canteli, M. (Spain)
Bendl, Jiri (Czech Republic)	Martinez, André (France)
Bitzer, Berthold (Germany)	Narsimhulu, Sanke (India)
Boccaletti, Chiara (Italy)	Niememan, Asco (Finland)
Burgos Payan, M. (Spain)	Petkovska, L. (Macedonia)
Brslica, Vit (Czech Republic)	Predescu, Mihai (Romania)
Capolino, G.A. (France)	Redondo Gil, C. (Spain)
Cortez, Liliana (México)	Ribeiro, Hugo (Portugal)
Driesen, Johan (Belgium)	Robyns Benoit (France)
Donsión, M.P. (Spain)	Roger Folch, J. (Spain)
Duran, M. (Spain)	Rusek, Jan (Poland)
Eguiluz Morán, L.I. (Spain)	Saadate, S. (France)
Ertan, H.B. (Turkey)	Salmerón-Revuelta, P. (Spain)
Fernández Cabanas, M. (Spain)	Sanz Badía, M. (Spain)
Figueiredo, J.M.G. (Portugal)	Shibli, Murad (Arab Emirats)
Flores, Antonio (Portugal)	Schlemmer, Erwin (Austria)
Fraile Mora, Jesús (Spain)	Stenzel, Jürgen (Germany)
Funabashi, Toshihisa (Japan)	Stumberger, Gorazd (Slovenia)
Gharehpetian, G.B. (Iran)	Tegopoulos, J.A. (Greece)
Ghita, Constantin (Romania)	Traça de Almeida, A. (Portugal)
Göl, Ozdemir (Australia)	Tudorache, Tiberiu (Romania)
Güemes Alonso, J.A. (Spain)	Valouch, V. (Czech Republic)
Hermoso Alameda, B. (Spain)	Vitale, Gianpaolo (Italy)
Iwazkiewicz, J. (Poland)	Wiak, Slawomir (Poland)
Jokinen, T. (Finland)	Zamora Belver, I (Spain)

PAPERS INDEX

203 Modeling and simulation of the microturbine generation system for on-grid and off-grid operation modes

Noroozian R.(1), Abedi M.(1), Gharehpetian G.B.(1), Hosseini S.H.(2)

(1). Department of Electrical Engineering, Amirkabir University of Technology, Tehran, Iran

(2). Department of Electrical and Computer Engineering, Tabriz University, Iran

206 Analysis of shaft voltage in a doubly-fed induction generator

Jafar Adabi (1), Firuz Zare (1), Arindam Ghosh (1), Robert D. Lorenz (2)

(1). School of Electrical Engineering, Queensland University of Technology, Australia

(2). University of Wisconsin-Madison, Depts. of ME and ECE, Australia

207 Analysis, calculation and reduction of shaft voltage in induction generators

Jafar Adabi, Firuz Zare

School of Electrical Engineering, Queensland University of Technology, Australia

208 A novel configuration for voltage sharing in DC-DC converters

Alireza Nami (1), Arash.A.Boora (1), Firuz Zare (1), A. Ghosh (1), F.Blaabjerg (2)

(1). School of Engineering Systems, Queensland University of Technology, Brisbane, Australia

(2). Aalborg University, Institute of Energy Technology, Denmark

217 Considerations regarding testing of low voltage equipment endowed with contacts from composite materials type CMC

George Curcanu, Ilie Sboru

R&D National Institute ICMET- Craiova, Romania

220 Effect of concentration of KOH, H₂O, temp in in-situ transesterification reaction of Sesbania sesban, capparid seed

S.N. Dalvi (1), P.E.Funde (1), R.D.Pokharkar (1), K.C.Mohite (2)

(1). Department of Chemistry, S.N. Arts, D.J.M. Commerce & B.N.S. Science College Sagamner, India

(2). OSD, BCUD, University of Pune, India

222 Quality of power energy from wind power plant

F.Rajský (1), M.P. Donsi3n (2)

(1). Faculty of Electrical Engineering, The University of West Bohemia in Pilsen, Czech Republic

(2). Department of Electrical Engineering, University of Vigo, Spain

223 Finite element analysis of electrical machines used in two-frequency indirect temperature rise tests

Erwin Schlemmer

ELIN EBG Motoren GmbH, Austria

225 FPGA Implementation of a multiphase space vector modulation for asymmetrical dual three-phase AC machines

J. Prieto (1), F. Barrero (1), S. Toral (1), M.R.Arahal (1), M.J. Dur3n (2)

(1). Electronic & System and Automation Engineering Departments, E.S.I. University of Sevilla, Spain

(2). Electrical Engineering Department, E.S.I. University of M3laga, Spain

232 Modeling, control and simulation of a high-current DC-DC converter for fuel cell applications

Hadi Y. Kanaan (1), Semaan Georges (2), Imad Mougharbel (3), Nassar Mendalek (2), Tony Nicolas (1)

(1). Saint-Joseph University, Faculty of Engineering-ESIB, Beirut, Lebanon

(2). Notre-Dame University (NDU), Lebanon

(3). Department of Electrical Engineering, Lebanese University, Faculty of Engineering- Lebanon

239 Analytical model and investigation of a four-switch space-vector modulated hybrid power filter with six-fold switching symmetry

Jiri Klima (1), Josef Tlustý (2), Jiri Skramlík (3), Viktor Valouch (3)

(1). Department of Electrical Engineering and Automation, Technical Faculty of CZU in Prague. Czech Republic

(2). Department of Power Engineering, Faculty of Electrical Engineering, CTU, Prague. Czech Republic

(3). Institute of Thermomechanics, Academy of Sciences of the Czech Republic

243 System studies and DC reactor type fault current limiter in distribution grid

M.Firouzi (1), M.Pishvaie (1), G.Gharpetian (2), F.Razavi (1)

(1). Faculty of Electrical Engineering, University of Tafresh, Iran

(2). Faculty of Electrical Engineering, University of Amirkabir, Iran

247 A multi objective multi-stage particle swarm optimization MOPSO search scheme for power quality and loss reduction on radial distribution system

Adel M. Sharaf, Adel A.A. El- Gammal

Energy Research Centre, University of Trinidad and Tobago UTT

249 Investigation of solar energy applications with design and implementation of photovoltaic traffic light signal system for Qatar

Hassan Moghbelli (1), Khaled Ellithy (2), Zohreh Eslami (1), R. Vartanian (3), D. Wannous (1), A. Fayad (1), O.Basha (1), A.El Ghamrawy (1), M.Qaraqe (1), S. Nicola (1)

(1). Texas A&M University at Qatar, Doha, Qatar

(2). Qatar University, Doha, Qatar

(3). Texas A&M University, College Station, Texas, USA

250 Economic and environmental impact of geothermal production electricity in São Miguel, Açores
José Manuel Rosa Nunes

Departament Economiics and Management. Azores University. Portugal

252 DG integration limits in distribution networks

T.Yebra, V. Fuster, A. Quijano, P. Llovera

Instituto de Tecnología Eléctrica. University of Valencia. Spain

254 Economic analysis and application of small micro/hydro power plants

Sarala P. Adhau

Electrical Engineering Department, Yeshwantrao Chavan College of Engineering Nagpur University, India

256 Restrained search predictive control of dual three-phase induction motor drives

M.J Durán (1), M.R.Arahal (2), F.J. Barrero (2), S.L.Toral (2), R. Gregor (2)

(1). Department of Electrical Engineering. University of Málaga. Spain

(2). Department of Electronic and Automatic Engineering. University of Sevilla. Spain

257 Artificial intelligence techniques for controlling PV-wind powered rural zone in Egypt

Hanaa M.Fargli (1), Faten H. Fahmy (1), Mohamed A. H.EL- Sayed (2)

(1). Electronics Research Institute, National Research Center building, Cairo, Egypt

(2). Center of Energy Studies, University of Trinidad and Tobago

259 Centralized normalization of harmonic voltages in the supply network for traction substations

L.I. Kovernikova

The Siberia Branch of the Russian Academy of Sciences. Energy Systems Institute. Russia

- 260 Analysis and NN-based control of doubly fed induction generator in wind power generation
Orlando Manuel Soares (1), Henrique Nuno Gonçalves (2), António Pina Martins (2), Adriano da Silva Carvalho (2)
(1). Escola Superior de Tecnologia e de Gestão. Instituto Politécnico de Bragança. Portugal
(2). Faculdade de Engenharia da Universidade do Porto. Portugal
- 262 Voltage measurement errors as a result of multiple VT groundings
F. Uriondo (1), G. Aguirre (1), J.R. Hernández (1), J.M. García (2)
(1). Department of Electrical Engineering. E.S.I. Bilbao. University of the Basque Country. Spain
(2). INGETEAM T&D. Spain
- 264 High power fuel cell simulator using an unity active power factor rectifier
J.C. Alfonso-Gil (1), J.J. Vague Cardona (2), F.J. Gimeno- Sales (3), S. Seguí- Chilet (4), S. Orts Grau (5), N. Muñoz- Galeano (6)
(1-5). Department of Electronic Engineering. Universidad Politécnica de Valencia. Spain
(6). University of Antioquia, Medellín. Colombia
- 265 Improved control of current controlled grid connected inverters in adjustable speed power energies
J.J. Vague Cardona (1), J.C.Alfonso Gil (1), F.J. Gimeno Sales (1), S. Segui- Chilet (1), S. Orts Grau (1), N. Muñoz Galeano (2)
(1). Department of Electronics Engineering. Universidad Politécnica de Valencia. Spain
(2). Department of Electrical Engineering. University of Antioquia. Medellín, Colombia
- 268 Identification of photovoltaic array model parameters by robust linear regression methods
Maria Carmela Di Piazza, Antonella Ragusa, Gianpaolo Vitale
Consiglio Nazionale della Ricerche. Istituto di Studi sui Sistemi Intelligenti per l'Automazione (ISSIA).
Palermo. Italy
- 270 Evaluation of different methods for voltage sag source detection based on positive-sequence components
Boštjan Polajžer, Gorazd Štumberger, Drago Dolinar
University of Maribor. Faculty of Electrical Engineering and Computer Science. Maribor, Slovenia
- 273 Measurement and calculation of harmonics in distribution power system with connected small co-generation facility Etan
Ana Tomasovic (1), Mate Lasic (1), Božidar Filipovic-Grcic (2)
(1). Koncar Electrical Engineering Institute.Croatia
(2). Faculty of Electrical Engineering and Computing. Zagreb. Croatia
- 275 Predicting daily distribution of solar irradiation by neural networks
Sebastijan Seme, Gorazd Štumberger, Jože Pihler
University of Maribor. Faculty of Electrical Engineerig and Computer Science. Maribor, Slovenia
- 280 Calculation of excessive losses in low voltage line caused by computers
Klemen Deželak, Gorazd Štumberger
University of Maribor. Faculty of Electrical Engineering and Computer Science. Maribor, Slovenia
- 282 Permanent switchboard monitoring using embedded web server
F. Fioretti, S. Pasqualini, A. Andreoli, P. Pierleoni
Dipartimento di Ingegneria Biomedica, Elettronica e Telecomunicazioni. Università Poltecnica delle Marche. Ancona, Italy
- 283 Electromagnetic compatibility at the mains ports for medical equipments
Mircea Ion Buzdugan (1), Emil Simion (1), Horia Balan (1), Eugen Baru (2)
(1). Department of Electrical Engineering. Technical University from Cluj-Napoca. Romania
(2). Datronix Computer Ltd. Cluj-Napoca. Romania

286 Low distortion boost rectifier discontinuous conduction mode with peak current mode control for wind power systems

O. Carranza (1), E. Figueres (2), G. Garcerá (2), L.G. González (3)

(1). Escuela Superior de Cómputo- Instituto Politécnico Nacional. México

(2). Departamento de Ingeniería Electrónica- UPV. Spain

(3). Departamento de Electrónica y Comunicaciones. Universidad de los Andes, Mérida. Venezuela

287 Nonlinear regression applied for power quality disturbances characterization in grids with wind generators

P. Janik, T. Lobos, J. Rezmer, Z. Waclawek

Department of Electrical Engineering. Wroclaw University of Technology. Poland.

290 Simple electrical circuit for large signal modelling of DC microgrids

Mishel Mahmoodi (1), Gevorg B. Gharehpetian (2)

(1). Research Development Deputy, Iran Power Plant Projects Management Co. (MAPNA)

(2). Electrical Engineering Department, Amirkabir University of Technology. Iran

292 Dynamic simulation of a photovoltaic installation

Ramos Hernanz JA (1), Campayo Martín J.J (1), Zamora Belver, I. (2), Puelles Pérez, E (1), Métrico

Gogeochea, JA (1), Sancho Sáiz, J (3)

(1). Department of Electrical Engineering. E.U.I.Vitoria.Gasteiz University of the Basque Country. Spain

(2). Department of Electrical Engineering E.T.S.I. Bilbao. University of the Basque Country. Spain.

(3). Department of Nuclear Engineering and Mechanical of Fluids. E.U.I.Vitoria -Gasteiz. Spain

295 Dynamic control of fuel cell powered water pumping station

Adel M. Sharaf, Mohamed A.H.El-Sayed

Center of Energy Studies. University of Trinidad and Tobago

297 Instruments for on-line monitoring of transformers

V. Mentlík (1), P. Prosr (1), R. Polanský (1), J. Michalík (2), M. Brandt (2)

(1). University of West Bohemia in Pilsen. Faculty of Electrical Engineering, Department of Technologies and Measurement

(2). Research Centre of Mechatronics Systems. Faculty of Electrical Engineering ŽU in ŽILINA. Slovakia

298 Synthetic ester-based oils and their application in power industry

V. Mentlík, R. Polanský, P. Prosr, J. Pihera, P. Trnka

University of West Bohemia in Pilsen. Faculty of Electrical Engineering, Department of Technologies and Measurement. Czech Republic.

300 Power frequency overvoltages generated by solar plant inverters

Francisco Pazos (1), Amaya Barona (2), Javier Amantegui (1), Eduardo Azcona (1), Sonia Fernández (2)

(1). Iberdrola Distribución Eléctrica S.A.U. Bilbao. Spain

(2). Iberdrola Distribución Eléctrica. Valencia. Spain

301 Experimental comparison of carrier and space vector PWM control methods for three-phase NPC converters

Ivo Pereira, António Martins

Department of Electrical and Computer Engineering. Faculty of Engineering of the University of Porto. Portugal

303 Power quality in wind power systems

Z. Leonowicz

Department of Electrical Engineering. Wroclaw University of Technology. Poland

308 High efficiency squirrel cage induction machines

T. Tudorache, L. Melscescu, V. Petre

University Politehnica of Bucarest. Electrical Engineering Faculty, Electrical Machines. Romania

312 The optimization of the tracking mechanism used for a group of PV panels

C. Alexandru, C. Pozna

Product Design and Robotics Department. University "Transilvania" of Brasov. Romania

315 Vehicle-to-grid power in Danish electric power systems

Jayakrishnan R. Pillai, Brigitte Bak-Jensen

Department of Energy Technology, Aalborg University. Denmark

317 Improved Kalman filter based inverter control for reduction of low order current harmonics due to isolation transformers in renewable energy sources

H. Beltrán (1), J. Zabalza (1), C. Ariño (2), E. Belenguer (1), E. Pérez (1), N. Aparicio (1)

(1). Electrical Engineering Area. Department of Industrial Systems Engineering and Design. ESTCE,

University Jaume I de Castelló. Spain

(2). Systems Engineering and Automatic Area. Department of Industrial Systems Engineering and Design. ESTCE,

(3). University Jaume I de Castelló. Spain

319 Comparison of environmental and life cycle impact of switched reluctance motor drive and inverter-fed induction motor drives

P. Andrada, B. Blanqué, E. Martínez, J.I. Perat, J.A. Sánchez, M. Torrent

GAECE. EPS d' Enginyeria de Vilanova i la Geltrú, Department d' Enginyeria Elèctrica. Technical University of Catalonia (UPC). Barcelona. Spain

322 Millman's theorem revisited

G. Aguirre-Zamalloa, F. Uriondo, J.R. Hernández

Department of Electrical Engineering, Faculty of Engineering University of the Basque Country. Bilbao, Spain

324 An estimation and synchronization method based on a new modelling approach of power electrical signals

G. Fedele, C. Picardi, D. Sgrò

Department of Electronics, Computer and System Science. University of Calabria. Italy

326 Two-speed synchronous generator for special purposes

K. Celic (1), M. Pužar (2), S. Berberovic (3)

(1). Ministry of Economy, Labour and Entrepreneurship, Energy and Mining Directorate. Zagreb, Croatia

(2). Faculty of Electrical Engineering in Osijek. Croatia

(3). Faculty of Electrical Engineering and Computing. Zagreb, Croatia

327 A case study of sharing the harmonic voltage distortion responsibility between the utility and the consumer

F.H. Costa, I.N. Santos, S.F.P. Silva, J.C. de Oliveira

Group of Power Quality. Faculty of Electrical Engineering, Federal University of Uberlandia. Brazil

332 Stand-alone wind power system operating with a specific storage structure

M. Druga (1), C. Nichita (1), G. Barakat (1), E. Ceanga (2)

(1). GREAH-Groupe de Recherche en Electrotechnique et Automatique du Havre, University of Le Havre, France

(2). Department of Electrical Energy Conversion Systems, Faculty of Electrical Engineering, "Dunarea de Jos" University of Galati, Romania

333 DC-bus voltage controllers for a three-phase voltage-source inverter for distributed generation
Bart Meersman, Bert Renders, Lieven Degroote, Tine Vandoorn, Lieven Vandeveld
Department of Electrical Energy, Systems and Automation, Ghent University, Belgium

334 Fault locations in transmission systems by evolutionary algorithms
Wilingthon Guerra, Nelson Kagan
Department of Energy and Automation Engineering. Centro de Estudos em Regulação e Energia Elétrica (Enerq-ct). Universidade de São Paulo (USP). Escola Politecnica. Brazil

336 A novel multi-loop PID controller for photovoltaic-grid interface DC energy utilization farm
A.M. Sharaf (1), I.H. Altas (2), E. Ozkop (2)
(1). Energy Research Goup-UTT, University of Trinidad and Tobago, Trinidad
(2). Department of Electrical and Electronics Engineering, Karadeniz Technical University, Turkey

337 A novel multi-loop fuzzy logic dynamic controller for wind/photovoltaic-grid interface DC energy utilization farm
A.M. Sharaf (1), I.H. Altas (2), E. Ozkop (2)
(1). Energy Research Goup-UTT, University of Trinidad and Tobago, Trinidad
(2). Department of Electrical and Electronics Engineering, Karadeniz Technical University, Turkey

338 Control strategy of the 'MRG' wave energy converter (WEC)
Juan Luis Osa Amilibia (1), Ekaitz Zulueta Guerrero (2)
(1). Mechanical Department, University Collage of Engineering, University of Basque Country, Vitoria
(2). Automatics and Electronics Department, University College of Engineering, Universit of Basque Country, Vitoria- Spain

340 Micro hydro power plants in Andean Bolivian communities: impacts on development and environment
Andrés Hueso González, Alejandra Boni Aristizábal, Rafael Monterde Díaz
Group of Studies on Development, Cooperation and Etihics. Department of Projects Engineering. Politehcnical University of Valencia. Spain

341 Lab model for a low power wind turbine system
Constantin Ghita, Dragos Ioan Deaconu, Aurel Ionut Chirila, Valentin Navrapescu, Daniel Ilina
Electrical Machines and Drives Department, Electrical Engineering Faculty, Universitatea Politehnica Bucuresti, Romania

343 A control strategy for combined series-parallel active filter system under non-periodic conditions
M. Ucar, S. Ozdemir, E. Ozdemir
Electrical Education Department, Technical Education Faculty, Kocaeli University, Turkey

347 Automatic management of energy flows of a stand-alone renewable energy with support of hydrogen
M. Calderón (1), A.J. Calderón (1), A. Ramiro (2), J.F. González (2)
(1). Department of Electrical Engineering. E.I.I. Extremadura University Spain
(2). Department of Applied Physics. E.I.I. Extremadura University. Spain

350 Uninterruptible energy production in standalone power systems for telecommunications
E.F.F. Ribeiro (1), A.J. Marques Cardoso (1), C. Boccaletti (2)
(1). University of Coimbra, FCTU/IT. Department of Electrical and Computer Engineering. Portugal
(2). Sapienza University of Rome. Department of Electrical Engineering. Italy

353 A case study of transient and dynamic performance of saturated core reactor Static Var Compensator
J.A.F. Barbosa Jr (1), J.C. Oliveira (1), A.B. Vasconcellos (2), J.M. Pacheco (2)
(1). Faculty of Electrical Engineering. UFU, Federal University of Uberlândia. Brazil
(2). Department of Electrical Engineering, Federal University of Mato Grosso. Brazil

355 ATP-MODELS language to represent domestic refrigerators performance with power quality disturbances

I.A. Bacca, M.V.B. Mendonça, C.E. Tavares, I.N. Gondim, J.C. Oliveira
Faculty of Electrical Engineering. UFU. Federal University of Uberlândia. Brazil

356 Design issues of redundant protection and supervision system for the special purpose power converters

Dmitri Vinnikov, Indrek Roasto, Valery Vodovozov
Department of Electrical Drives and Power Electronics Tallinn University of Technology. Estonia

357 The impact of transportation costs on the profitability of heat and power generation with wood products

J. Parrilla (1), W. Fichtner (2)
(1). Brandenburg Technical University of Cottbus. Germany
(2). Institute for Industrial Production. Karlsruhe. Germany

359 Efficiency optimization of the high-power isolated DC/DC converters through THD and losses reduction in isolation transformers

Dmitri Vinnikov (1), Victor Bolgov (2)
(1).Tallinn University of Technology, Department of Electrical Drives and Power Electronics. Tallinn. Estonia
(2). Tallinn University of Technology, Department of Fundamentals of Electrical Engineering and Electrical Machines. Tallinn. Estonia

367 Modelling and comparative performance analysis of special six-phase and conventional synchronous generators for wind farm application

P.H.B. Naves, J.C. Oliveira, A.F. Bonelli, M.V.B. Mendonça
Faculty of Electrical Engineering. UFU, Federal University of Uberlândia. Brazil

368 Simulation of the aerodynamic behaviour of a micro wind turbine

J.M.M. Monteiro (1), J.C. Páscoa (1), F.M.R.P. Brójo (2)
(1). Department of Electromechanical Engineering. University Of Beira Interior. Portugal
(2). Department of Aerospace Sciences and Technology. University of Beira Interior. Portugal

369 A computational tool focusing the optimization of 34.5 and 138 kV overhead lines transmissible power

A.P. Marsicano (1), I. Nord (2), C.E. Tavares (1), J.C. Oliveira (1), J.W. Resende (1)
(1). Faculty of Electrical Engineering. Federal University of Uberlândia. Brazil
(2). CEMAT-Grupo Rede. Brazil

370 Hierarchical cluster classification of half cycle measurements in low voltage distribution network for events discrimination

D. Apetrei (1), P. Postolache (2), N. Golovanov (2), M. Albu (2), G. Chicco (3)
(1). SC Electrica SA. Romania
(2). UPB . Romania
(3). Politecnico di Torino, Dipartimento di Ingegneria Elettrica. Italy

372 Comparison of different voltage dip detection techniques

M.A. Alonso, J.F. Sanz, J. Sallán, J.L. Villa
CIRCE Foundation. University of Zaragoza. Electrical Engineering Department. Spain

373 Fitting regression model and experimental validation for high pressure PEM electrolyzer

M. Santarelli, P. Medina, M. Cali
Dipartimento di Energetica. Politecnico di Torino. Italy

375 Fuel consumption optimization of a multimachines microgrid by secant method combined with IPPD table

Firas Alkhalil (1), Philippe Degobert (1), Frédéric Colas (1), Benoit Robyns (2)

Laboratoire d'Electrotechnique et d'Electronique de Puissance de Lille.

(1). Ecole Nacional Supérieure des Arts et Métiers Paris Tech, L2EP, Lille. France

(2). Ecole des Hautes Etudes d'Ingénieurs, L2EP, Lille. France

376 Concept for optimization and simulation of renewable energy parks with desalination

D. Buschert, B. Bitzer

South Westphalia University of Applied Sciences, Campus Soest, Germany

378 Dynamic response analysis of small wind energy conversion systems (WECS) operating with torque control versus speed control

L.G. González (1), E. Figueres (2), G. Garcerá (2), O. Carranza (3)

(1). Departamento de Electrónica y Comunicaciones, Universidad de los Andes, Mérida, Venezuela

(2). Departamento de Ingeniería Electrónica-UPV. Spain

(3). Escuela Superior de Cómputo- Instituto Politécnico Nacional. México

379 Synchronization techniques comparison for sensorless control applied to PMSG

L.G. González (1), E. Figueres (2), G. Garcerá (2), O. Carranza (3)

(1). Departamento de Electrónica y Comunicaciones, Universidad de los Andes, Mérida, Venezuela

(2). Departamento de Ingeniería Electrónica-UPV. Spain

(3). Escuela Superior de Cómputo- Instituto Politécnico Nacional. México

380 A control circuit small wind turbines with low harmonic distortion and improved power factor

O. Carranza (1), E. Figueres (2), G. Garcerá (2), L.G. González (3)

(1). Escuela Superior de Cómputo- Instituto Politécnico Nacional. México

(2). Departamento de Ingeniería Electrónica-UPV. Spain

(3). Departamento de Electrónica y Comunicaciones, Universidad de los Andes, Mérida, Venezuela

382 Spectrum of induction machine stator currents, affected by clutch wobbling and mixed eccentricity

Saleh S. Hamad Elawgali

Al Tahadi University. Faculty of Engineering Electrical and Electronics Engineering Department. Sirte-

Libya

385 Design procedures for small synchronous generators with interior permanent magnet rotors

Johann Peter Bacher

Institute of Drive Technology and Electrical Machines.E.A.M, University of Technology Graz, Austria

386 Online efficiency diagnostic of three phase asynchronous machines from Start up data

Johann Peter Bacher, F. Waldhart

Institute of Drive Technology and Electrical Machines. E.A.M, University of Technology Graz, Austria

388 Performance analysis of three-phase PWM rectifiers for high power quality applications

J.A.A. Caseiro, A.M.S. Mendes

University of Coimbra, FCTUC/IT. Department of Electrical and Computer Engineering. Portugal

389 Simplified control method for unified power quality conditioner (UPQC)

Metin Kesler, Engin Ozdemir

Kocaeli University Technical Education Faculty, Turkey

390 Unit cube capacity calculation by means of finite element analysis

César S. Cañas Peñuelas, S. Catalán Izquierdo, J.M. Bueno Borrachina, Francisco Cavallé Sesé

Institute of Electrical Technology. Valencia, Spain

- 391 Impact of compact fluorescent lamps on energy transmission losses and power quality
Gorazd Štumberger (1), Klemen Deželak (1), Sebastijan Seme (1), Mirán Rošer (2), Viktor Tajnšek (2)
(1). University of Maribor, Faculty of Electrical Engineering and Computer Science, Slovenia
(2). Elektro Celje d.d., Celje, Slovenia
- 392 EMC issues for wind turbines
M.C. Esteban (1), F. Arteche (1), M. Iglesias (1), F.J. Arcega (2)
(1). Instituto Tecnológico de Aragón (ITA), Zaragoza, Spain
(2). Department of Electrical Engineering, University of Zaragoza, Spain
- 398 Hydrogeothermal cascade heat pump economic and ecologic apropiacy
Darko Goricanec (1), Aleksandar Saljnikov (2), Dragi Antonijevic (3), Jurij Krope (1), Mirko Komatina (2)
(1). University of Maribor, Faculty of Chemistry and Chemical Technology, Slovenia
(2). University of Belgrade, Faculty of Mechanical Engineering, Serbia
(3). Singidunum University, Faculty of Applied Ecology, Belgrade, Serbia
- 399 A voltage-source inverter for microgrid applications with an inner current control loop and an outer voltage control loop
Tine Vandoorn, Bert Renders, Frederik De Belie, Bart Meersman, Lieven Vandeveldde
Electrical Energy Laboratory (EELAB), Department of Electrical Energy, Systems and Automation (EESA).
Ghent University, Belgium
- 402 Heat transfer in spherical micro solar cell modules
Andrei P. Negoias (1), Alexandru M. Morega (1,2), Mihaela Morega (1)
(1). Faculty of Electrical Engineering, University Politehnica of Bucharest, Romania
(2). Institute of Statistical Mathematics and Applied Mathematics "Gh. Mihoc-C.Iacob", Romanian Academy, Bucharest, Romania.
- 403 European strategic energy technology plan
C. Redondo Gil, L.A. Esquibel, A.M. Alonso Sánchez
Electrical Engineering & Systems Engineering and Automatic Control Department, Faculty of Industrial and Computer Engineering, University of Leon, Spain
- 406 On-line detection of voltage transient disturbances using ANNs
F.J. Alcántara, J.R. Vázquez, P. Salmerón, S.P. Litrán, M.I. Arteaga Orozco
Departamento de Ingeniería Eléctrica y Térmica, Escuela Politécnica Superior, Universidad de Huelva, Spain
- 408 Maximum power point tracker of a photovoltaic system using sliding mode control
M.I. Arteaga Orozco, J.R. Vázquez, P. Salmerón, S.P. Litrán, F.J. Alcántara
Departamento de Ingeniería Eléctrica y Térmica, Escuela Politécnica Superior, Universidad de Huelva, Spain
- 410 Analysis by state equation of a control strategy for hybrid filter
S.P. Litrán, P. Salmerón, J.R. Vázquez
Departamento de Ingeniería Eléctrica y Térmica, Escuela Politécnica Superior, Universidad de Huelva, Spain
- 413 Case study : flicker transfer coefficient and frequency components
A. Lazkano (1), J.J. Gutiérrez (1), L.A. Leturiondo (1), F. Pazos (2), J. Ruiz (1)
(1). Department of Electronic and Telecommunication, Faculty of Engineering, University of The Basque Country, Bilbao, Spain
(2). Iberdrola Distribucion S.A. Bilbao, Spain
- 416 Advantages of the public water supply use for micro power generation
Sergio Ramos, A. António Gomes, Marílio Cardoso, Luís Castanheira
Department of Electrical Engineering, Polytechnic Institute of Oporto, GECAD, Portugal

419 Solar mixed thermal and photovoltaic installation for an infantile educational-sanitary lodging in Senkata-El Alto (BOLIVIA)

A. Daniel Rey Rey (2), B. Manuel Alejandro Miguez Ruanova (2), C. Francisco Manuel León Mayo (2), Iago Fernández Otero (2), Vicente Gándara Villadoniga (2), A. López Agüera (2)

(1). Department of Particle Physic & Galician Institute of High Energy Physics

(2). Master in Renewable Energies. South Campus. Santiago de Compostela, Spain

421 Rotating speed stability and mechanical vibration analysis of one-stage inertia flexible rotor driven by variable speed drives

F. Oliveira (1,2), M. P. Donsión (3), G. Peláez (4)

(1). Department of Electrical Engineering, School of Technology and Management, Polytechnic Institute of Leiria, Portugal

(2). Institute for Systems and Computer Engineering at Coimbra, Portugal.

(3). Department of Electrical Engineering, University of Vigo. Spain

(4). Department of Mechanical Engineering, University of Vigo. Spain

426 Robust control of STATCOM based on sliding mode technique

Mohammadali Abbasian

Department of Engineering, Islamic Azad University - Khorasgan Branch, Isfahan, Iran

432 Cross-docking project: a case study

C. Paciarotti, F.E. Ciarapica, G. Giacchetta

Dipartimento di Energetica, Università Politecnica delle Marche, Ancona, Italy

433 Design blades of a wind turbine using flexible multibody modelling

Maria Augusta Neto (1), Wenbin Yu (2), Jorge A.C. Ambrósio (3), Rogério Pereira Leal (1)

(1). Departamento de Engenharia Mecânica. Faculdade de Ciência e Tecnologia da Universidade de Coimbra. Portugal

(2). Department of Mechanical and Aerospace Engineering. Utah State University, Logan, USA

(3). Instituto de Engenharia Mecânica. Instituto Superior Técnico. Lisboa, Portugal

436 Comparison of R744 and R134a heat transfer coefficients during flow boiling in a horizontal circular smooth tube

R. Mastrullo (1), A.W. Mauro (1), A. Rosato (1), G.P. Vanoli (2)

(1). D.E.TE.C. Facoltà di Ingegneria, Università degli Studi di Napoli Federico II. Italy

(2). Dipartimento di Ingegneria, Università degli Studi del Sannio, Italy

438 Process of desalination of low energy consumption and high compatibility with the use of renewable energies

Pedro Peñas Ballester, Francisco Javier Abad Garrido

Prointec, Spain

444 A practical approach to the cogeneration system for rural appliances

Jan Iwaszkiewicz (1), Jacek Perz (1), C. Jaroslaw Mikielewicz (2)

(1). The Electrotechnical Institute, Gdansk Branch, Poland

(2). The Szwalski Institute of Fluid-flow Machinery. Poland

446 Simulation of power quality disturbances effects on an induction motor with ATP/EMTP. Comparison with laboratory measurements

José Gonçalves (1), José Baptista (1), Luís Neves (2,3), Filipe Tadeu Oliveira (2,3)

(1). University of Trás-os Montes e Alto Douro. Portugal

(2). School of Technology and Management. Polytechnic Institute of Leiria, Portugal

(3). INESC Coimbra, Portugal

- 448 Synthesis and characterization of new polymer liquid crystals for externally regulated direct methanol fuel cells
A. Martinez (1), P. Henderson (2), E. Ballester (1), C. Imrie (2), A. Ribes(1)
(1). Scholl of Industrial Design Engineering. Univ. Politécnica de Valencia, Spain
(2). Department of Chemistry, Meston Walk University of Aberdeen, United Kingdom
- 450 Genetic algorithm approach in FACTS devices location for the improvement of energy efficiency in distribution networks
Paola Pezzini (1), Oriol Gomis Bellmunt (1), Carlos González de Miguel (1), Adrià Junyent Ferre (1), Antoni Sudrià Andreu (1,2)
(1). CITCEA- UPC. Departament d' Enginyeria Elèctrica, Universitat Politécnica de Catalunya. Spain
(2). REC Catalanian Institute for Energy Research. Barcelona. Spain
- 451 Capacitance evaluation on parallel-plate capacitors by means of finite element analysis
S. Catalán Izquierdo, José M. Bueno Barrachina César S. Cañas Peñuelas, Francisco Cavallé Sesé
Institute of Electrical Technology. Paterna. Valencia, Spain
- 452 Capacitance evaluation on perpendicular plate capacitors by means of finite elemental analysis
José M. Bueno Barrachina, César S. Cañas Peñuelas, S. Catalán Izquierdo, Francisco Cavallé Sesé
Institute of Electrical Technology. Paterna. Valencia, Spain
- 455 Comparison of European interconnection and operation requirements for wind farms
Marcela Martinez Rojas, Andreas Sumper, Oriol Gomis Bellmunt, Roberto Villafáfila Robles, Eduard Valseira Naranjo
CITCEA-UPC. E.U. d' Enginyeria Tècnica Industrial de Barcelona- Departamento de Ingeniería Eléctrica. Spain
- 456 Photovoltaic power conversion system based on cascaded inverters with synchronized space-vector modulation
Valentin Oleschuk (1), Josef Tlustý (2), Viktor Valouch (3)
(1). Institute of Power Engineering, Academy of Sc. of Moldova
(2). Department of Power Engineering, Faculty of Electrical Engineering, CTU, Prague, Czech Republic
(3). Institute of Thermomechanics, Academy of Sc. of Czech Republic
- 458 High voltage circuit breakers: SF6 vs. Vacuum
A. Iturregi, E. Torres, I. Zamora, O. Abarategui
Department of Electrical Engineering. UPV-EHU. Barakaldo. Spain
- 462 Performance and measurement of power quality due to harmonics from street lighting networks
E. R. Manzano (1), M. Carlorosi (2), M. Tapia Garzón (3)
(1). Dpto Luminotecnia, Luz y Visión, FACET, Universidad Nacional de Tucumán, Argentina
(2). Dpto Ingeniería Eléctrica, FACET, Universidad Nacional de Tucumán, Argentina
(3). Electro Civil S.A. San Miguel de Tucumán, Argentina
- 465 Supply security and the reliability of the Spanish generator system in the next two decades based on the costs of fossil fuels and nuclear option
F. Delgado, A. Ortíz, C.J. Renedo, S. Pérez, M. Mañana
Department of Electrical and Energy Engineering. E.T.S.I.I., Cantabria University, Spain
- 466 Eucalyptus globulus waste as fuel in a power plant
S. Pérez, C.J. Renedo, A. Ortíz, M. Mañana, C. Tejedor, N. Sanke, F. Delgado
Department of Electrical and Energy Engineering. E.T.S.I. Industrial and Telecommunication, University of Cantabria, Spain

- 467 Environmental/economic power dispatch of microgrid using multiobjective optimization
Faisal A. Mohamed (1), Heikki N. Koivo (2)
(1). Department of Electrical Engineering. Omar Al-Mukhtar University. Libya
(2). Department of Automation and Systems Technology. Helsinki University of Technology. Finland
- 468 Asynchronized turbogenerators and compensators for improving the electric power quality
N.D. Pinchuk, O.V. Antoniuk, M.B. Roigarts
Chief Engineer, Chief Designer and Deputy Chief Designer Branch ELECTROSILA of the OJSC Power
Machines, St.Petersburgo, Russia
- 469 Effects of flow direction and thermal short-circuiting on the performance of coaxial ground heat
exchangers
Enzo Zanchini, Stefano Lazzari, Antonia Priarone
Università di Bologna, Dipartimento di Ingegneria Energetica, Nucleare e del Controllo Ambientale,
Bologna. Italy
- 472 Micro grid stabilization using the virtual synchronous machine (VISMA)
Ralf Hesse, Dirk Turschner, Hans-Peter Beck
Institute of Electrical Power Engineering. Clausthal-Zellerfeld. Germany
- 473 Monitoring results of the 30 kWp PV grid-connected power system installed at University
Politecnica of Bucharest, Romania
Aurelian Craciunescu, Mihai Predescu, Mihai Otavian Popescu, Claudia Laurenta Popescu, Gloria Stefania
Ciumbulea
Electrical Engineering Faculty, University Politehnica of Bucharest, Romania
- 475 A kriging-based partial shading analysis in a large photovoltaic field for energy forecast
Annalisa Di Piazza (1), Maria Carmela Di Piazza (2), Gianpaolo Vitale (2)
(1). Dipartimento di Ingegneria Idraulica e Applicazioni Ambientali (DIIAA). Università degli Studi di
Palermo. Italy
(2). Consiglio Nazionale delle Ricerche. Istituto di Studi sui Sistemi Intelligenti per L' Automazione
(ISSIA-CNR) Palermo, Italy
- 476 Velocity-controlled piezoelectric switching energy harvesting device
Yuan-Ping Liu (1,2), Dejan Vasic (1), François Costa (1,3), Wen-Jong Wu (2), C.K. Lee (2,4,5)
(1). Système et Application des Technologies de l'Information et de l'Energie, Universud, Ecole Normale
Supérieure de Cachan, France
(2). Department of Engineering Science and Ocean Engineering, National Taiwan University, Taipei,
Taiwan
(3). IUFM de Créteil, Université Paris 12, St Denis, France
(4). Institute of Applied Mechanics, National Taiwan University. Taiwan
(5). Industrial Technology Research Institute of Taiwan
- 477 Development of switchable transformer research at University of South Australia
H.A. Dharmawan, A.M. Ali
School of Electrical and Information Engineering, University of South Australia, Adelaide, South Australia
- 478 Design and operation of a local cogeneration plant supplying a multi-family house (9,5 kW
electrical/ 35 kW thermic power)-a field report
Thomas Schuster
Department of Electrical Drives and Machines, Graz, University of Technology, Austria
- 480 Capacitor switching techniques
S.J. Kulas
Faculty of Electrical Engineering, Warsaw University of Technology, Poland

481 A multicriteria evaluation model to optimally place grid-connected photovoltaic power plants
J. Arán-Carrión, A.F. Ramos-Ridao, F. Aznar-Dols, E. Alameda Hernández, A. Espín-Estrella
Department of Civil Engineering. School of Civil Engineering, University of Granada, Spain

482 Germany's new code for generation plants connected to medium-voltage networks and its repercussion on inverter control
Antonio Notholt
Institut für Solare Energieversorgungstechnik. División Engineering and Power Electronics. Kassel, Germany

483 On the evaluation of power quality indices in distribution systems with dispersed generation
A. Bracale (1), G. Carpinelli (2), A. Di Fazio (3), D. Potro (2)
(1). Department for Technologies, University of Naples Parthenope, Italy
(2). Department of Electrical Engineering, University of Naples Federico II, Italy
(3). Department of Industrial Engineering, University of Cassino, Italy

485 Improved method for detection and classification of transients and waveform distortions using sine fitting algorithms
T. Radil (1), P.M. Ramos (1,2), A.C. Serra (1,2)
(1). Instituto de Telecomunicações, Lisbon, Portugal
(2). Department of Electrical and Computer Engineering, Instituto Superior Técnico, Technical University of Lisbon, Portugal

487 Energy saving policy in water distribution networks
M. Giugni (1), N. Fontana (2), D. Portolano (3)
(1). Department of Hydraulic, Geotechnical and Environmental Engineering, University of Naples Federico II, Italy
(2). Department of Engineering, University of Sannio, Benevento, Italy
(3). Centre of Environmental Research C.I.R.A.M. University of Naples Federico II, Italy

488 Benefits of distributed energy storage working in parallel to distributed energy resources
A. Goikoetxea (1), J.A. Barrena (1), M.A. Rodríguez (2), G. Abad (1)
(1). Faculty of Engineering, University of Mondragón, Spain
(2). Ingeteam Transmission&Distribution S.A. Protección y Control de Redes Eléctricas. Spain

490 Integral management system for the energy efficiency improvement in commercial facilities: application to the Polytechnic University of Valencia
G. Escrivá, M. Alcázar, C. Alvarez
Instituto de Ingeniería Energética. Universidad Politécnica de Valencia, Spain

493 Tools for assessing the robustness variation of power system against voltage dips
P. Caramia (2), C. di Perna (1), P. Varilone (1), P. Verde (1)
(1). Dipartimento di Ingegneria Industriale. University of Cassino, Italy
(2). Dipartimenti per le Tecnologie. University of Napoli Parthenope, Italy

495 Equalizing voltage levels in MV distribution network of Elektra Zagreb
I. Sagovac, G. Sagovac
HEP- Distribucija d.o.o. DP Elektra Zagreb. Croatia

496 Detection of nacelle anemometers faults in a wind farm
Francisco Javier Beltrán Martínez (1), Andrés LLombart (1,2), J.J. Guerrero (3)
(1). Fundación CIRCE. Centro Politécnico Superior. Universidad de Zaragoza. Spain
(2). Department of Electrical Engineering. Universidad de Zaragoza. Spain
(3). I3A and Dept Informática e Ingeniería de Sistemas. Universidad de Zaragoza, Spain

497 Analysis of Electrical field in a 6 kV form-wound coil with flat shape void
C.H. Rojas, M.G. Melero, M.F. Cabanas, J.M. Cano, G.A. Orcajo, J.F. Pedrayes
Department of Electrical Engineering, University of Oviedo, Spain

501 Kalman filter and wavelets transform based three-phase power quality disturbances detection, classification and diagnosis tool implementation-hardware and software
Alexandre A. Carniato, Ruben B. Godoy, João Onofre P. Pinto
Department of Electrical Engineering DEL, Federal University of Mato Grosso do Sul. BATLAB- Lab. of Artificial Intelligence, Digital Systems and Power Electronics. Brasil

502 A high-efficient microcontrolled buck converter with maximum power point tracking for photovoltaic systems
P.C.M. Bernardo (1), Z.M.A. Peixoto (1), L.V.B. Machado Neto (2)
(1). Graduate Program in Electrical Engineering
(2). Group of Studies in Energy - GREEN Solar
PPGEE. Pontifical Catholic University of Minas Gerais-PUCMINAS. Brasil

503 Modeling and simulation of a supervision and management system of hybrid energy systems for the pantanal region
Daniela Luiza Catelan Carneiro, João Onofre Pereira Pinto, Ruben Barros Godoy, Alexandra Maria A.C.Pinto
Department of Electrical Engineering. DEL. Federal University of Mato Grosso de Sul. BATLAB- Laboratory of Artificial Intelligence, Digital Systems and Power Electronics. Brasil

504 Effect of air intake pressure drop on performance and emissions of a diesel engine operating with biodiesel and ultra low sulphur diesel (ULSD)
Rizalman Mamat, Nick Rosli Abdullah, Hongming Xu, Miroslaw L. Wyszynski, Athanasios Tsolakis
School of Mechanical Engineering. The University of Birmingham, United Kingdom

506 Features of a cycloid speed increaser with double satellite gear for small mechatronic wind and hydro systems
C. Jaliu, D.V. Diaconescu, M. Neagoe, R. Saulescu
Product Design and Robotics Department, Transilvania University of Brasov, Romania

508 Fuel consumption minimization of a cogeneration system multi machines associated with a photovoltaic
Mélissa Dondas (1), Firas Alkhalil (1), Philippe Degoberte (1), Frédéric Colas (1), Benoit Robyns (2)
(1). Laboratoire d'Electrotechnique et d'Electronique de Puissance de Lille (L2EP). Ecole National Supérieure des Arts et Metiers (ENSAM) Lille, France
(2). Ecole des Hautes Etudes d'Ingénieurs (HEI), L2EP Lille, France

510 Feasibility study for the installation of offshore wind farms in the Canary Islands
M. Martínez, A. Pulido, J. Romero, N. Angulo, F. Díaz, F.Déniz
Department of Electrical Engineering. E.T.S.I.I.Las Palmas de Gran Canaria. Spain

512 Remote community electrification
Martin Anyi (1), Sam Ali (2), Brian Kirke (3)
(1). University Malaysia Sarawak, Malaysia
(2). School of Electrical and Information Engineering, University of South Australia
(3). Sustainable Energy Centre, University of South Australia

518 Neural network based model for a PEM fuel cell system
I. Zamora (1), J.I. San Martín (2), J.J. San Martín (2), V.Aperribay (2), P. Eguía (1)
(1). Department of Electrical Engineering. University of the Basque Country. Spain
(2). Escuela Técnica Superior de Ingeniería de Bilbao. Spain

- 519 Influence of the number of blades on the mechanical power curve of wind turbines
M. Predescu, A. Bejinariu, O. Mitroi, A. Nedelcu
ICPE SA-SICE Centre, Bucharest, Romania
- 520 Prediction of photovoltaic generation for distribution network planning
Miguel Ramón Marín(1), Andreas Sumper(2), Roberto Villafáfila Robles(2), Carlos González de Miguel(2)
(1). Endesa Distribucion Eléctrica D.L. Planificación y Calidad de la Red. Barcelona, Spain
(2). E.U.d' Enginyeria Tècnica Industrial de Barcelona, Dpto. de Ingeniería Eléctrica, Spain
- 524 Wind energy potential assessment in Republic of Macedonia
V. Dimcev, K. Najdenkoski, V. Stoikov, Z. Zokolanski
Faculty of Electrical Engineering and Information Technologies. Skopje. Republic of Macedonia
- 525 Virtual instrument as a tool for teaching power quality
Vladimir Dimcev, Zivko Kokolanski, Cvetan Gavrovski, Mare Srbinovska
Faculty of Electrical Engineering and Information Technologies, Dept. of Electrical Measurements.
Skopje. Republic of Macedonia
- 527 Dispatch merit order-the place of renewable energy
Nuno Domingues
ISEL, Instituto Superior de Engenharia de Lisboa, Portugal
- 528 The fundamental particle and energy quanta of dark matter and dark energy: Boltzmann particles and utilization its energy
Murad Shibli
Mechanical Engineering Department. College of Engineering, United Arab Emirates University, Al- Ain, United Arab Emirates
- 529 Fault detection in the manufacturing process of form-wound coils by means of dissipation factor and hipotesis
M.G. Melero, M.F. Cabanas, C.H. Rojas, J. Norriella, F. Pedrayes, J.M. Barrera
Department of Electric Engineering. University of Oviedo, Spain
- 530 Analysis of methodologies for the economical evaluation of power quality
D. Coll-Mayor (1), J. Pardo (2), M. Pérez Donsión (3)
(1). Department of Physics, University of Balearic Islands, Palma de Mallorca (Spain)
(2). Department of Industrial Organization, ETSII, Vigo University. Spain
(3). Department of Electrical Engineering, ETSII, Vigo University. Spain
- 531 Pumped storage hydro plant model for educational purpose
Péter Kádar
Budapest Tech, Dept. of Power Systems. Budapest, Hungary
- 532 Influence of slot opening width and rotor pole radius on the torque of PMSM
J.A. Güemes (1), P.M. García (2), A.M. Iraolagoitia (1), J.J. Ugartemendia (2)
(1). Department of Electrical Engineering. E.U.I.T.I. University of the Basque Country. Bilbao. Spain
(2). Department of Electrical Engineering. Escuela Universitaria Politécnica. University of the Basque Country. San Sebastian. Spain
- 534 Predictable impact of lighting control on the energy consumption of a building through computational simulation
H. Bernardo (1,3), S. Leitão (2), L. Neves (1,3), P. Amaral (1,3)
(1). Departamento de Electrical Engineering, School of Technology and Management, Potytechnic Institute of Leiria, Portugal
(2). Department of Engineering, University of Trás-os-Montes and Alto Douro. Portugal
(3). Institute for Systems and Computer Engineering at Coimbra, Portugal.

P1 Harmonics in Power Systems

J.L. Hernández (1), M.A. Castro (2), J. Carpio (2), A. Colmenar (2)

(1) Department of Electricity. IES La Laboral de La Laguna.

Avda. Lora y Tamayo, 2. La Laguna. Tenerife.

(2) Department of Electrical, Electronic and Control Engineering

E.T.S.I.I.- U.N.E.D.

C. Juan del Rosal, 12. Ciudad Universitaria. Madrid 28040. Spain.
